

BTICINO > Wiring devices > Living Now > Living Now SMART - Modular version > Wired devices for light and shutter

K4411C

Dimmer/switch. It allows to control lights locally or remotely, with the dimmer functionality that can be activated from APP Home+Control. It has the same installation and usability of a traditional switch and it is compatible with all loads (LED, halogen) with max power 150W at 230 V (or 75W at 110V). It's equipped with a blue LED light used for localization modality or load status modality, configurable by APP. It can be connected to one or more traditional push-button or associated with "wireless light switches". Caution: Must be connected to the neutral. Power supply 110-230Va.c. - 1 module.

Technical features

Brand	BTicino
Rated voltage	110 - 230 Vac
Rated power W	150W
N° of modules	1
Series	Living Now
